

Proposed 2025 Ambulatory Payment Classification (APC) Groups for Audiology Codes (2025 Proposed Rule on the Hospital Outpatient Prospective Payment System (OPPS))

Tables 1-7 see below for APC assignments, status indicators (SI), and reimbursement amounts for audiology codes. An “S” status indicator denotes a “Separate APC Payment” where regardless of services performed on the same date of service, the CPT code is paid at the APC rate. A “Q1” status indicator represents “STV-Packaged Codes” where APCs and CPT codes billed on the same date of service as those assigned a status indicator of “S”, “T” or “V” are packaged and not paid for separately. If billed without the “S”, “T,” or “V” service, payment is made at the APC rate. Status indicator “N” indicates payment is packaged into payment for other services, therefore no separate APC payment will be allowed. Status indicator “E1” is not paid by Medicare when submitted on outpatient claims. CPT 92650 (Aep scr auditory potential) has a status indicator of E1 and is not assigned to an APC.

Table 1: APC 5721-Level I Diagnostic Tests and Related Services

(2022 final = \$142.59)

(2023 final = \$143.43)

(2024 final = \$148.98)

(2025 proposed = \$155.47)

CPT Code	Code Descriptor	2022 Final	2023 Final	2024 Final	2025 Proposed
92537	Caloric vestibular test with recording, bilateral; bitherma	S	S	S	S
